## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach, disclose, or suggest, either alone or in combination a piezoelectric actuator drive circuit comprising: a charge/discharge circuit section for charging and discharging a piezo-stack mounted on a piezoelectric actuator; and an abnormality detection circuit section for detecting a conduction abnormality of the current supply cable, wherein the abnormality detection circuit section includes: a voltage detection means for detecting a voltage at a non-ground side connection terminal out of the connection terminals; and a comparison means for comparing a detected voltage with a reference voltage for supplying a comparison signal. Therefore, the limitations contained on claims 1-7 are considered to be in condition of allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
